Ari Johan Alvarado Fausto

Software Developer

+52 3320131621 | johanalvarado296@gmail.com | Portfolio | GitHub | LinkedIn
Guadalajara, Jalisco, Mexico

Fullstack developer with experience in web application development using React and Next.js for frontend, and Node.js, NestJS, and Express for backend. Work with SQL and NoSQL databases such as PostgreSQL, MongoDB, MySQL, and SQL Server. Built web applications from scratch based on client needs, migrated desktop systems to web platforms, and integrated REST APIs with existing systems. Experience deploying applications to the cloud with Vercel and Render.

EDUCATION

Universidad Tecnológica de la Zona Metropolitana de Guadalajara Sep 2022 – Apr 2026
Software Development and Management Engineering (Bachelor's level), completed

CONALEP Acatlán de Juárez 2019 – 2022
Technical High School Diploma in Automotive Electronics

EXPERIENCE

Private Client (Freelance)
Frontend Developer - Project Lead Nov 2025 – Jul 2026
Built an interactive web reading platform for high schools and universities. Built the frontend with a focus on user experience, integrated REST APIs, and developed a digital reader with annotations, automatic assessments, PDF reports, and role-based access (student, teacher, principal, and parent or guardian).

CONSOL NEGOCIOS SA DE CV SOFOM ENR (Contract)
Full Stack Developer Jan 2026 – Apr 2026
Built a web system for managing credits and centralizing financial information. Migrated features from a desktop system to a web platform and built modules for individual credit, group credit, and insurance.

LIRA (Own Project)
Software Developer - Project Lead Jan 2025 – Nov 2025
Built LIRA, an educational system to help children learn to read, available on Android TV, Alexa, web, and mobile. Presented at Innovation Fest 2025.

Tecnosol (Contract)
Full Stack Developer May 2024 – Aug 2024
Built a web application for managing clients and orders, with an e-commerce focus. Automated administrative processes, integrated REST APIs, and deployed and managed the application on a server with cPanel.

MicroGreen (Own Project)
Software Developer - Project Lead Jan 2024 – Apr 2024
Designed and built a greenhouse monitoring and automation system that measures humidity, light, and temperature and controls irrigation from a mobile app. Integrated MongoDB and IoT devices (Arduino and ESP32).

UTZMG
Web Developer Sep 2022 – Jan 2023
Built the "Take Quick List" web application for registering and tracking student attendance, working on the frontend, backend, and data validation.
