Ari Johan Alvarado Fausto

Software Developer

+52 3320131621 | johanalvarado296@gmail.com | Portfolio | GitHub | LinkedIn |

Guadalajara, Jalisco, Mexico

Fullstack developer with experience in web application development using React and Next.js for frontend, and Node.js, NestJS, and Express for backend. Proficient in SQL and NoSQL databases such as PostgreSQL, MongoDB, MySQL, and SQL Server. Developed web applications from scratch tailored to client requirements, migrated desktop systems to web platforms, and integrated REST APIs with existing systems. Experienced in application deployment on cloud environments like Vercel and Render.

EDUCATION

Universidad Tecnológica de la Zona Metropolitana de Guadalajara (UTZMG) Sep 2022 – Apr 2026

B.S. in Software Development and Management, successfully completed

CONALEP Acatlán de Juárez 2019 – 2022

Technical High School in Autotronics

EXPERIENCE

Private Client (Freelance) — Front End Developer - Project Lead Nov 2025 – Jul 2026

Developed an interactive web reading platform for high school and higher education institutions. Frontend focused on UX, REST API integration, digital reader with annotations, automated assessments, PDF reporting, and role-based access control (student, teacher, director, and tutor).

CONSOL NEGOCIOS SA DE CV SOFOM ENR (Contract) — Full Stack Developer Jan 2026 – Apr 2026

Developed a web system for credit management and centralized financial information administration. Migrated features from desktop systems to web platforms, and built individual, group, and insurance credit modules.

LIRA Project (Independent Project) — Software Developer - Project Lead Jan 2025 – Nov 2025

Developed the LIRA educational system, a multiplatform project available on Android TV, Alexa, web, and mobile app, designed to improve interactive learning for children. Presented at Innovation Fest 2025.

Tecnosol (Contract) — Full Stack Developer May 2024 – Aug 2024

Developed and implemented a web application for client and order management with an e-commerce focus, including administrative process automation, REST API integration, and application deployment and server administration via cPanel.

MicroGreen (Independent Project) — Software Developer - Project Lead Jan 2024 – Apr 2024

Designed and implemented a greenhouse monitoring and automation system measuring humidity, light, and temperature, with irrigation control via a mobile app. Integration with MongoDB and IoT devices (Arduino and ESP32).

UTZMG — Web Developer Sep 2022 – Jan 2023

Complete development of the "Take Quick List" web application for student attendance registration and tracking. Involved in frontend, backend, and data validation implementation.
