

Ari Johan Alvarado Fausto

Software Developer

+52 3320131621 | johanalvarado296@gmail.com | portafolio-johan-fausto.vercel.app |
github.com/JohanFausto14 | Guadalajara, Jalisco, Mexico

Fullstack developer with experience in web application development using React and Next.js for frontend, and Node.js, NestJS, and Express for backend. Proficient in SQL and NoSQL databases such as PostgreSQL, MongoDB, MySQL, and SQL Server. Developed web applications from scratch tailored to client requirements, migrated desktop systems to web platforms, and integrated REST APIs with existing systems. Experienced in application deployment on cloud environments like Vercel and Render.

EDUCATION

- | | |
|--|---------------------|
| UTZMG University
B.S. in Software Development and Management, successfully completed | Sep 2022 – Apr 2026 |
| CONALEP Acatlán de Juárez
Technical High School in Autotronics | 2019 – 2022 |
| Technical School #87 | 2016 – 2019 |

EXPERIENCE

- | | |
|---|---------------------|
| Private Client — Front End Developer
Developed an interactive web reading platform for high school and university institutions. Focused on frontend UX and performance, REST API integration, PDF reporting, and role-based access control (student, teacher, director). | Nov 2025 – Jul 2026 |
| CONSOL NEGOCIOS SA DE CV SOFOM ENR — Full Stack Developer
Developed a web system for credit management and centralized financial information administration. Migrated features from desktop systems to web platforms, and built individual, group, and insurance credit modules. | Jan 2026 – Apr 2026 |
| LIRA Project (Intellectual Property) — Software Developer
Developed the LIRA educational system, a multiplatform project available on Android TV, Alexa, smartwatches, web, and mobile app, designed to improve interactive learning for children. Presented at Innovation Fest 2025. | Jan 2025 – Nov 2025 |
| MicroGreen (IoT & Smart Agriculture) — Software Developer
Designed and implemented a greenhouse monitoring and automation system measuring humidity, light, and temperature, with irrigation control via a mobile app connected to MongoDB and integrated with IoT (Arduino and ESP32). | Jan 2024 – Apr 2024 |
| Tecnosol — Full Stack Developer
Developed and implemented a web application for client and order management with an e-commerce focus, including administrative process automation, REST API integration, and deployment on a dedicated server. | May 2024 – Aug 2024 |
| UTZMG — Web Developer
Complete development of the "Take Quick List" web application for student attendance registration and tracking. Involved in frontend, backend, and data validation implementation. | Sep 2022 – Jan 2023 |

SKILLS

Programming: Python, C++, PHP, JavaScript, TypeScript, HTML, CSS

Frameworks: React, Next.js, React Native, Node.js, NestJS, Express, Tailwind CSS

Databases: PostgreSQL, MongoDB, MySQL, SQL Server

Tools: Docker, AWS, Vercel, Render, Git, GitHub, Linux, Postman, Android Studio, Arduino, ESP32

Soft Skills: Effective Communication, Leadership, Empathy, Critical Thinking, Emotional Intelligence

Languages: Spanish (Native), English — B2 Upper-Intermediate (CEFR) | [EF SET Certified ↗](#)
